PROFESSIONAL SUMMARY

Senior iOS Engineer with 10+ years of experience building and shipping production mobile applications across healthcare, IoT, e-commerce, and payments. Strong in Swift, SwiftUI, UIKit, modern concurrency, and modular architecture, with experience spanning technical design, performance optimisation, testing, and App Store delivery. Specialises in real-time, connection-heavy apps (BLE, WebSockets, live data) with clean concurrency boundaries.

TECHNICAL SKILLS

iOS & Languages	Swift, Objective-C, SwiftUI, UIKit, SwiftUI/UIKit interop, Combine, Core Data, SwiftData, Core Location, Core Bluetooth (BLE), MapKit, APNs, Accessibility (VoiceOver, Dynamic Type)
Concurrency	Swift 6 strict concurrency, async/await, actors, Sendable, structured concurrency, GCD
Architecture	MVVM, Clean Architecture, modular multi-target apps, Swift Package Manager, dependency injection, repository and strategy patterns, protocol-oriented design
Networking & Security	URLSession, REST, GraphQL, WebSockets, Codable, OAuth 2.0/JWT, Keychain, LocalAuthentication (Face ID/Touch ID), App Transport Security, payment gateway SDKs
Quality & Observability	XCTest, Swift Testing, Instruments, Memory Graph Debugger, LLDB, Firebase Crashlytics, MetricKit, crash root-cause analysis
CI/CD & Release	Xcode Cloud, GitHub Actions, Fastlane, TestFlight, App Store Connect, signing/provisioning, Git
AI-Assisted & Applied AI	Claude Code, GitHub Copilot, Claude API, Core ML, Python, FastAPI

PROFESSIONAL EXPERIENCE

Independent iOS Engineer **Sep 2024 – Present**

Swift, SwiftUI & Modern Concurrency

- Designed and built iStocks, an open-source real-time stock watchlist in SwiftUI, Combine, and Swift 6 with zero third-party dependencies.
- Put REST, WebSocket, GraphQL, and mock data sources behind one repository protocol, injected by configuration, so new sources plug in without ViewModel changes.
- Isolated live-price state in an actor with Sendable models; kept WebSocket parsing and decoding off the main thread and crossed to @MainActor only at the UI boundary.
- Replaced ad-hoc connection flags with an explicit WebSocket state machine and added rate-limit-aware batching so prices load progressively within API limits.
- Covered state transitions and data-source switching with unit tests in XCTest and Swift Testing.
- In parallel, completed AI (SAIT, 2026) and project management (MacEwan, 2025) certificates.

Senior Mobile Developer **Aug 2022 – Aug 2024**

Tech Mahindra, Pune, India

- Delivered production iOS apps for enterprise clients in Swift, SwiftUI, UIKit, and Clean Architecture, owning features from client requirements through review, testing, and release.
- Built the core shopping and checkout features of a Magento-backed iOS commerce app.
- Drove incremental SwiftUI adoption, hosting new SwiftUI screens inside existing UIKit apps to modernize without a rewrite.
- Mentored iOS engineers and defined the code-review, branching, and XCTest standards adopted across client codebases.

- Owned App Store delivery: certificates, provisioning, TestFlight, and production releases.
- Served as primary technical contact for client engineering leads, triaging and resolving production issues across networking, app lifecycle, and third-party SDKs.

iOS Engineer **Sep 2017 – Aug 2022**

Volansys Technologies, Ahmedabad, India

- Owned the architecture of a production app within the Smart Garage Door platform, structuring shared features as reusable modules across three app targets.
- Designed the push-notification flow with the backend as the source of truth: the cloud scheduled APNs alerts and held them while the app had a live WebSocket connection, and the app reconciled state on resume.
- Built BLE and Wi-Fi communication layers with custom protocol handling and device pairing, partnering with firmware and backend teams.
- Diagnosed memory leaks, retain cycles, and CPU bottlenecks with Instruments and the Memory Graph Debugger; added deinit-based memory checks to CI to block regressions.
- Implemented Face ID/Touch ID sign-in, Keychain-backed credential storage, and encryption for regulated healthcare apps.

iOS Developer **May 2013 – Aug 2017**

Openxcell Technolabs, Ahmedabad, India

- Shipped multiple iOS apps for consumer and small-business clients in Objective-C and Swift, partnering with UI/UX designers from scope to App Store review.
- Built UIKit interfaces with Auto Layout and MapKit; integrated REST APIs, push notifications, and third-party SDKs.
- Migrated legacy Objective-C modules to Swift, improving type safety and resolving recurring crashes.

SELECTED PROJECTS

- **iStocks — Real-Time Stock Watchlist** · Open source
  Swift · SwiftUI · Combine · Swift 6 concurrency · XCTest
  Built an open-source real-time stock watchlist with live price streaming, modular REST/WebSocket/GraphQL data sources, and actor-isolated state management. Designed explicit connection-state handling and rate-limit-aware batching for reliable, testable data updates.
- **Smart Garage Door Opener — IoT Companion** · Volansys
  Swift · CoreBluetooth/BLE · WebSockets · Combine · Core Location · Azure · APNs
  Developed an IoT companion app for remote garage-door control, device pairing, and real-time status monitoring over BLE, Wi-Fi, and WebSockets. Supported geofence-triggered automation and push alerts for unexpected door activity, low battery, and maintenance.
- **Healthcare AI Safety — Local-LLM Medical Safety System** · Personal
  React · LM Studio · local LLM
  Prototyped a local-first AI safety system that explores safeguards against prompt injection, detects potential emergencies, and enforces medical-response boundaries. Designed layered checks to support safer AI interactions while keeping model execution local.
- **E-Commerce iOS Application** · Tech Mahindra
  SwiftUI · Combine · REST APIs · Magento · payment gateway SDKs · Core Data
  Full shopping experience covering catalogue, search, cart, checkout, and order management, with secure payment-gateway integration, real-time inventory feeds, and offline-capable order handling.

EDUCATION & CERTIFICATIONS

Integrated Artificial Intelligence, Post-Diploma Certificate — *SAIT, Calgary, AB, Canada* **2025 – 2026**

Project Management Certificate — *MacEwan University, Edmonton, AB, Canada* **2024 – 2025**

Bachelor of Technology, Information Technology — *Dharmsinh Desai University, India* **2010 – 2013**

Diploma, Information Technology — *BBIT, India* **2007 – 2010**
